
1. At a minimum, the proposed project complies with the performance standards of the most recent version of the Massachusetts Management Handbook including but not limited to:

- a) Employing environmentally sensitive site design
- b) Evaluation of Low Impact Development practices
- c) Incorporation of source controls of contaminants and employing BMP's to minimize stormwater pollution
- d) Sizing of water quality of BMP's are based on 1-inch runoff
- e) Methodology for hydrologic analyses (if necessary) is based on TR-55/TR-20 methodology
- f) Designing redevelopment of existing sites must provide a net improvement to stormwater conditions.

2. The activity shall not increase either the rate or volume of stormwater runoff leaving the site, nor shall it alter stormwater flow to any adjoining properties, public ways or any wetland resource areas, unless otherwise permitted based on improvements over existing conditions.

Check all that apply to this project:

- Roof drains emptying into dry wells/recharge basins
- Vegetated swales constructed
- Porous pavement installed; _____sq. ft.
- Water quality swale
- Rain barrels/cistern for irrigation
- Other methods (please list/describe):

3. The Applicant shall provide and maintain Erosion and Sedimentation controls, in accordance with the latest edition of the MA DEP Stormwater Handbook, as necessary until the site is permanently stabilized. BMP's selected for erosion controls shall be chosen to minimize site disturbance from erosion control installation. As soon as the site is stabilized, such measures shall be removed.

Check all that apply to this project:

- Compost Sock
- Silt fencing
- Construction entrance
- Temporary vegetative cover – mulch, netting
- Permanent vegetative cover – hydro seeding, seeding, sodding
- Slope stabilization
- Retaining walls
- Slope drains
- Other methods (please list/describe):

4. The Applicant shall ensure that the site and stormwater management systems are perpetually inspected and maintained to function as designed.

Check all that apply to this project:

- Visual inspections by the contractor
- Visual inspections by the homeowner
- Operation and Maintenance Plan
- Maintenance contract for stormwater components
- Other methods (please list/describe):

I certify that I have reviewed the design standards above and the information contained herein, including all attachments, is true, accurate and complete to the best of my knowledge. Further, I grant the Town of Randolph Stormwater Authority and its authorized agent's permission to enter the property to review this application and make inspections during and after construction.

SUBMISSION REQUIREMENTS

Materials (6 copies + 1 digital submission of all documents)

- Completed application with original signatures of all owners
 - Narrative describing the project
 - Plans, drawings or specifications for the project
 - Soil conditions where infiltration of stormwater is proposed
 - Pre and Post development topography at 2-foot contour intervals
 - Calculations demonstrating compliance with the design standards of the Ordinance. Calculations will be dependent on the disturbance activity contemplated in the application.
 - Other materials as the SWMPC may require to determine whether the project as proposed meets the design standards of the Stormwater Ordinance
 - Fee
-

OFFICE USE ONLY:

- Administrative Review
- Land Disturbance Permit
